Slush Machine

IMPORTANT FACT: If you use ANY extension cord that is thinner than your index finger(10 gauge) & more than 25ft. The Unit will be starved of power and WILL NOT FREEZE PRODUCT

IMPORTANT FACT: If you choose to use your own mixes and not purchase ours we cannot guarantee they will freeze properly. **Use your own mixes at your own risk.** Adding Alchol to the mix also slows down the freezing process

PLACE. MAKE SURE THE FEET ARE SECURED IN POSITION (SEE DIAGRAM ABOVE)UNIT CAN NOT BE MOVED ONCE LIQUID HAS BEEN POURED IN. If bowl is out of place any Liquid Added will spill all over your counter and floor. We are Not Responsible for replacing the product NOR for any cleanup related to this. The Rental Cost will not be discounted or Refunded. PLEASE MAKE SURE BOWLS ARE LOCKED INTO PLACE WITH THE FRAME OF THE UNIT BEFORE ADDING PRODUCT

How to mix product for 1 bowl:

WITHOUT ALCOHOL: 1/2 Gallon bottle of mix

+ 2 Gallons water

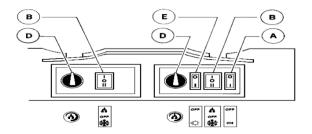

= 2 1/2 Gallons

WITH ALCOHOL: 1/2 Gallon bottle of mix

+ 1 1/2 Gallons water

Approximately 1/2 Gallon of Alcohol–or less, mix to taste

= 2 1/2 Gallons

It takes about 2 hours for the first batch to turn to slush. NEVER USE ICE CUBES ONLY USE COLD WATER, MIX, & ALCOHOL

Control Panels

A - Main power switch

push down to turn power on

"up" to position1 to get refrigerated drink.

to position II to slush/freeze

B - Push both switches Push both switches "down"

D - Turn all knobs

(clockwise) for refrigerated temperature.

E - Push down to turn

on cover lights if desired.

**After 1 hour:

- 1. Go back to B switches and push both switches down to position II. This activates the Slush/Freeze Cycle. It may take an additional 45-60 minutes for your drinks to be ready.
- 2. Keep machine out of the sun & Freeze alcohol for faster turnaround times
- 3. Keep any additional bottles of mix in the refrigerator. When bowls are 2/3 empty you can start another batch.

Clean Up: DO NOT take apart - just run warm water thru the bowls and drain.
